

# Supreme Ley Range

**ULTIMATE FORAGE QUALITY**

Top quality grass seed mixtures, giving outstanding field performance

The Supreme range of grass ley mixtures are specifically designed to incorporate some of the best available varietal material, tried and tested across the UK.

Now including:

**HERBAL LEYS  
HAY/HAYLAGE  
ORGANIC LEYS**

**FAST GRASS MIXES  
HI-PROTEIN LEYS  
SPECIALIST NON RYEGRASS LEYS**

## Supreme Shorter Term

A superb 2 to 3 year intensive silage and grazing ley. Gives good early and late season bite, plus very high silage yields with high sugar content. Can be cut up to 4 times per year or used for zero grazing.

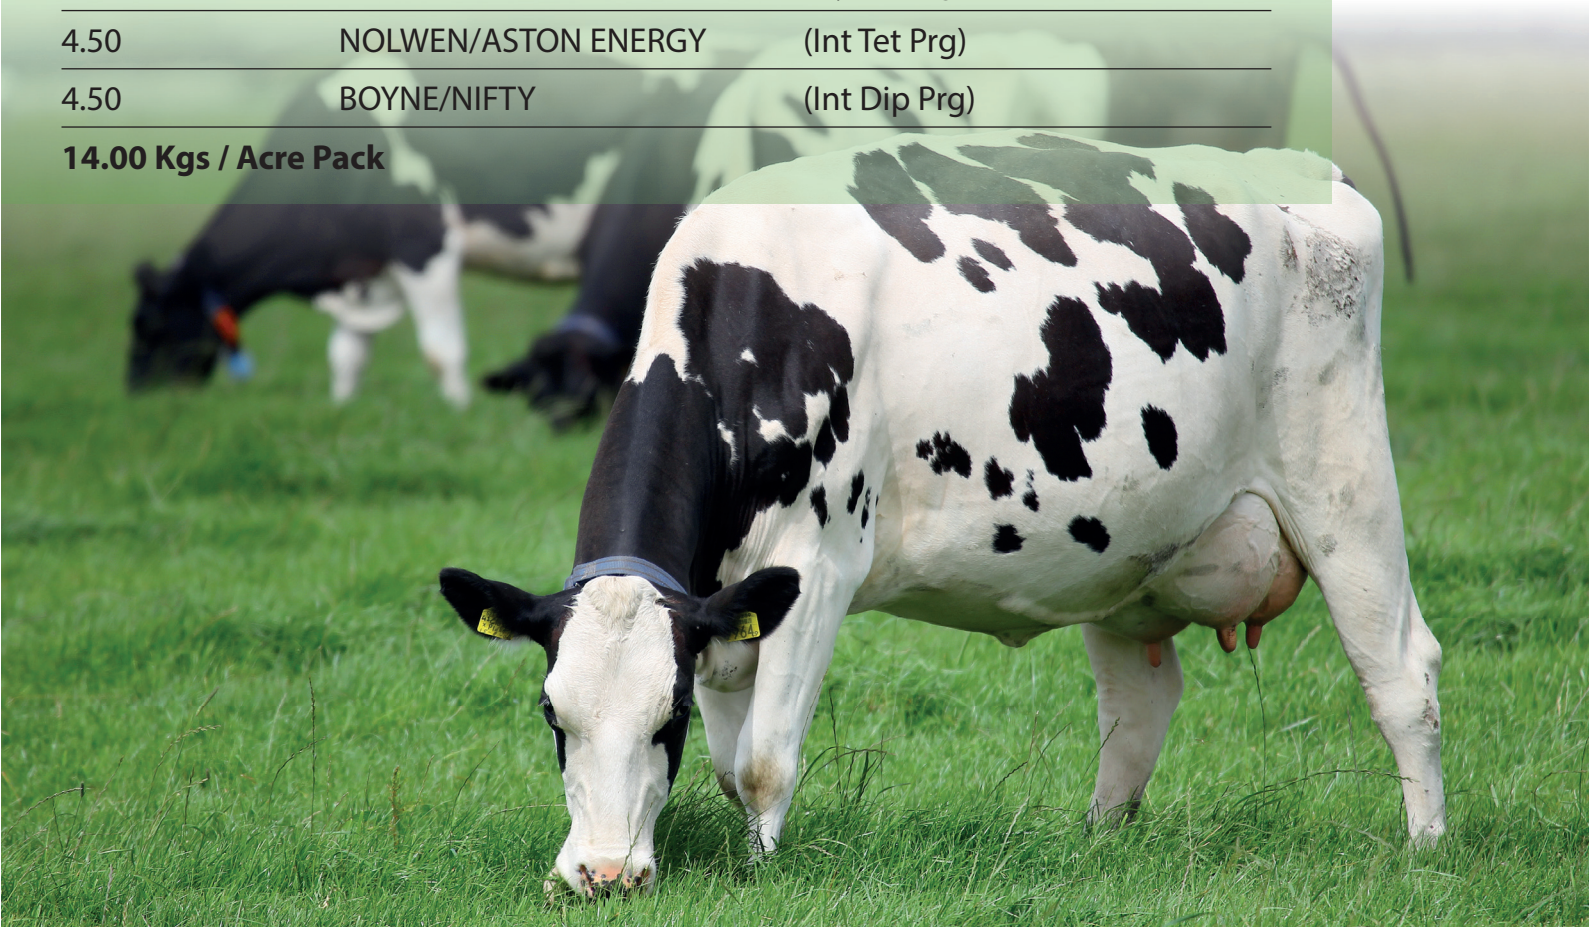

Weight (Kgs)	Variety	Species
4.00	FABIO/TEANNA	(Tet Ital Rg)
4.00	SHAKIRA	(Dip Ital Rg)
3.00	KIRIAL/ASTON CRUSADER	(Hybrid Rg)
3.00	ASTON ENERGY/NOLWEN	(Int Tet Prg)
14.00 Kgs / Acre Pack		

## Supreme Medium Term

Designed for 3 to 5 years duration. Ideal for dual purpose use on mixed livestock farms. Suits intensive regimes for dairy or silage systems. Medium term contains no Clover, enabling easy cost effective broad leaf weed control after establishment.

Weight (Kgs)	Variety	Species
1.50	KIRIAL/RAGT CORDIAL	(Hybrid Rg)
3.50	ASTON CRUSADER	(Hybrid Rg)
4.50	NOLWEN/ASTON ENERGY	(Int Tet Prg)
4.50	BOYNE/NIFTY	(Int Dip Prg)
14.00 Kgs / Acre Pack		

## Supreme Fast Grass Mixtures (1) + (2)

Two rapid, high producing Short Term mixtures, containing low temperature tolerant grasses. They are the perfect low cost options to sow late into autumn after Maize. Alternatively, use as a “quick fix” in spring or summer to boost on farm forage production.

Ideal for winter cropping, under sowing to Maize for soil erosion control and as “fuel” for AD Plants.

- Fast Grass mixtures expand the annual window of utilisation for forage production, because of their low temperature capability. This gives extra DM on the shoulders of the spring and autumn seasons.
- Fast Grass provides the flexibility of leaving down for further silage cuts into the second year after sowing. (Fast Grass Mixture NO: 2 is your choice for this approach).
- A real economic option to keep seed input costs low.
- They **provide extremely robust autumn and spring growth due** to the ability to produce forage DM at lower soil temperatures compared to other grasses.
- A perfect choice to under-sow to Maize in mid-summer to prevent soil erosion.
- **An ideal ‘intercrop’ option for producing a quality silage cut** before returning to maize late spring.
- Fast Grass **mixtures provide very high sugar and soluble carbohydrate** content in cut (or even grazed) forage.
- Fast Grass mixtures widen the sowing options in the summer and autumn season and give the opportunity to get three crops in two years!!
- A perfect choice too, to suppress indigenous grass weed problems.

## Fast Grass (1) 8 - 18 Months duration

%	Species
50	WESTERWOLDS RG
20	DIP ITALIAN RG
30	TET ITALIAN RG

## Fast Grass (2) 12 - 24 Months duration

%	Species
65	TET ITALIAN RG
35	DIP ITALIAN RG

Packed in multiples of 25 Kgs

## Supreme Protein Booster (With longer duration Red Clover)

The perfect mixture choice to enhance home grown forage protein. It's the simple, economic route, by way of maximising the utilisation of Red Clover in a high performance Ley. Protein Booster, as a result of it's specific design, will produce DM yields over a three to four year period. It's very persistent, with a dense canopy. Expect three to four cuts per annum.

Weight (Kgs)	Variety	Species
3.00	MILVUS/DIPLOMAT	(Longer duration red clover)
5.00	ASTON CRUSADER/KIRIAL	(Tet Hybrid Rg)
1.50	NIFTY/ASTON CONQUEROR	(Int Dip Prg)
4.00	ASTON ENERGY/DIWAN	(Int Tet Prg)

13.50 Kgs / Acre Pack

## Supreme Hay/Haylage Leys

Both designed specifically for high quality Hay/Haylage production

## Short Term Hay/Haylage 2 - 3 Years (Contains only Diploid types and free of any clovers)

Weight (Kgs)	Variety	Species
6.00	SHAKIRA	(Dip Ital Rg)
4.00	STAR	(Dip Ital Rg)
4.00	GENESIS/TEMPRANO	(Early Dip Prg)
<b>14.00 Kgs / Acre Pack</b>		

## Longer Term Hay / Haylage Leys 4 - 6 Years

Weight (Kgs)	Variety	Species
1.25	TBA	(Timothy)
1.25	LAURA/SENU	(Meadow Fescue)
4.00	TEMPRANO/GENESIS	(Early Dip Prg)
4.00	NIFTY/BOYNE	(Int Dip Prg)
2.50	OAKPARK	(Late Dip Prg)
1.00	CANCAN/KENDAL	(Late Dip Prg)
<b>14.00 Kgs / Acre Pack</b>		

## Supreme Supercut

A longer duration specialist silage mixture capable of 5 to 6 years top quality forage production. Contains leading varieties with high cutting scores, plus Timothy to help fill the mid-summer gap. Soluble carbohydrate / sugar levels are outstanding. Top quality combined with good ground cover and persistence (option without Timothy).

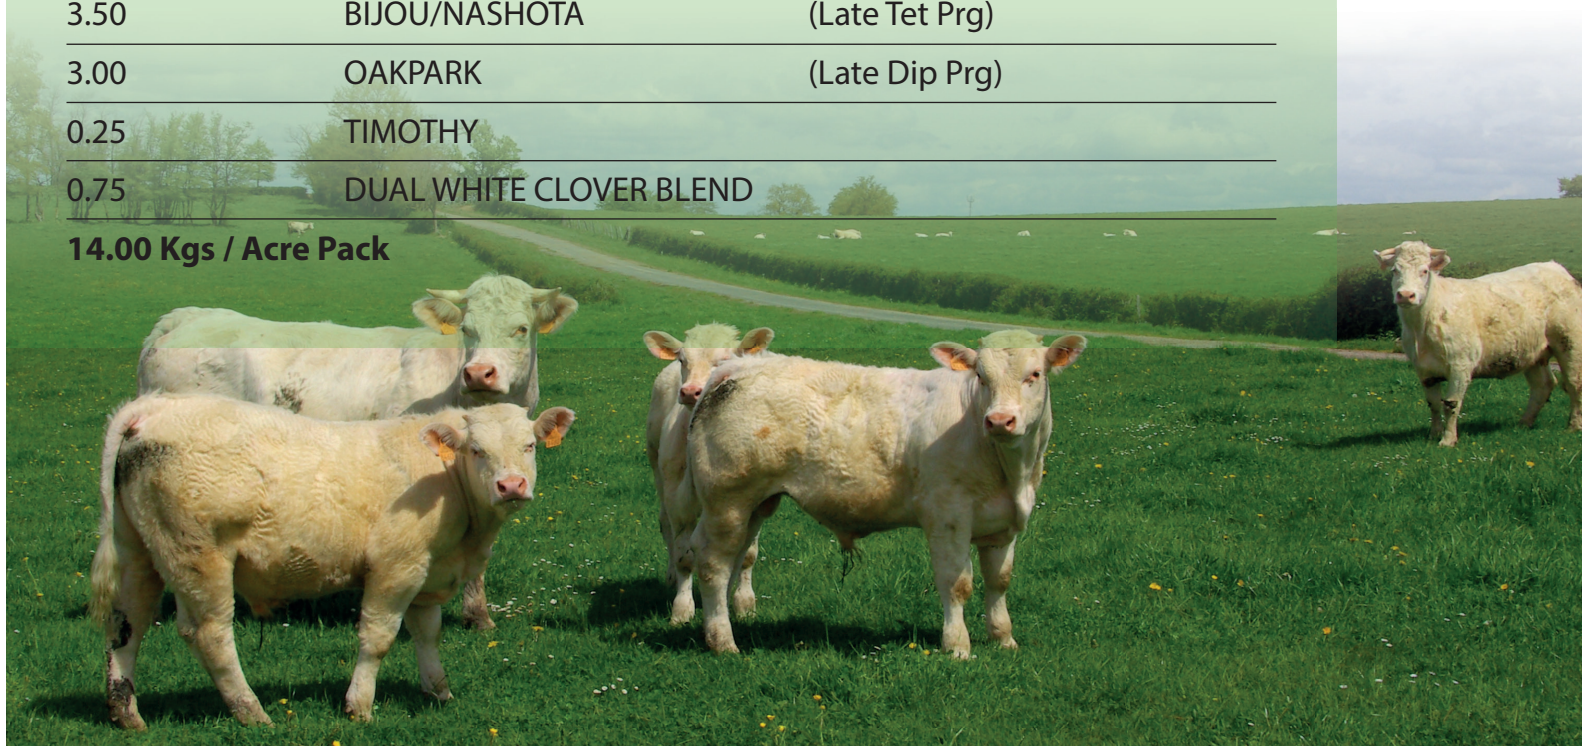

Weight (Kgs)	Variety	Species
4.50	NOLWEN	(Int Tet Prg)
2.00	NIFTY/AGASKA	(Int Dip Prg)
4.00	BIJOU	(Late Tet Prg)
3.00	OAKPARK/KENDAL	(Late Dip Prg)
0.50	TIMOTHY	
<b>14.00 Kgs / Acre Pack</b>		

## Supreme Long Term Dual Purpose

A highly flexible and productive long term Ley, inclusive of a quality White Clover Blend, containing medium and large leaved varieties. Absolutely perfect for a range of livestock situations. Gives exceptional high sugar silage, plus highly digestible aftermaths. (Duration a minimum of 5 to 7 years). Options without Clover/Timothy.

Weight (Kgs)	Variety	Species
2.50	AGASKA/BOYNE	(Int Dip Prg)
4.00	ASTON ENERGY/NOLWEN	(Int Tet Prg)
3.50	BIJOU/NASHOTA	(Late Tet Prg)
3.00	OAKPARK	(Late Dip Prg)
0.25	TIMOTHY	
0.75	DUAL WHITE CLOVER BLEND	
<b>14.00 Kgs / Acre Pack</b>		

## Supreme Permanent

An exceptionally hardy and persistent Ley mix, suited to a minimum of 8 to 10 years+ duration. Packed with top Diploid Perennial Ryegrasses to provide a dense durable bottom to the sward. Diploids make this mixture ideally conducive to grazing over a very long period. Flexible to make Hay, Haylage or Silage. First choice for combined Sheep and Cattle enterprises.

Weight (Kgs)	Variety	Species
2.50	GENESIS/TEMPRANO	(Early Dip Prg)
2.00	AGASKA/NIFTY	(Int Dip Prg)
2.50	OAKPARK	(Int Dip Prg)
2.00	CANCAN/KENDAL	(Late Dip Prg)
4.00	NASHOTA/BIJOU	(Late Tet Prg)
0.50	TIMOTHY	
0.50	PERMANENT WHITE CLOVER BLEND (Containing small medium and large leaved varieties)	
<b>14.00 Kgs / Acre Pack</b>		

## Supreme Total Graze

An outstanding top quality long term grazing mixture, suitable for both dairy cows and other ruminant livestock. It contains only Late Perennial Ryegrasses. The robust nature of this Ley design means not only will it last for a very long time, but is suited to a range of locations and soil types. This highly digestible leafy sward of high sugar grasses will enhance meat and milk production due to the palatability and nutritional gain from the leading varieties that make up this mixture.

Weight (Kgs)	Variety	Species
4.75	BIJOU/HURRICANE	(Late Tet Prg)
2.25	NASHOTA/TWYMAX	(Late Tet Prg)
3.50	OAKPARK/CAVENDISH	(Late Dip Prg)
3.50	CANCAN/TODDINGTON	(Late Dip Prg)
<b>14.00 Kgs / Acre Pack</b>		

**Supreme Total Graze can be ordered with or without  
a specialist grazing blend of White Clovers**

**PLEASE ASK FOR DETAILS AND ADVICE**

## Supreme HP Herbal Ley

A superb all-round herbal Ley that exhibits the huge advantages of herbal inclusion whilst providing additional contributions from the other mixture components. Provides an exciting alternative grazing option to just rye grass and clover mixtures.

Designed for continuous grazing and forage utilisation throughout the growing season. Improves soil structure, adds essential minerals, and enhances both palatability and the general health of grazing livestock. Perfect choice to lower or eliminate N based fertiliser usage.

Weight (Kgs)	Species
2.50	LATE TET PER RYEGRASS
2.50	LATE DIP PER RYEGRASS
0.75	FESTULOLIUM
2.25	SAINFOIN
0.75	TIMOTHY
0.75	MEADOW FESCUE
1.00	RED CLOVER
0.50	BIRDSFOOT TREFOIL
0.25	MEDIUM LEAVED WHITE CLOVER
0.25	SMALL LEAVED WHITE CLOVER
0.50	RIBWORT PLANTAIN
0.10	YARROW/SWEET FENNEL
0.50	PERSIAN CLOVER
0.70	BURNET
0.20	SHEEPS PARSLEY
0.50	PERENNIAL CHICORY

**OPTIONAL WITHOUT PERENNIAL CHICORY,  
BY INCREASING THE ALTERNATIVE HERB CONTENTS**

**14.00 Kgs / Acre Pack**

# Supreme Horse & Pony Paddock Mix

A specialist and proven equine mixture primarily for grazing with an option to cut for hay or haylage. Very long term and highly durable. **This specific mix does not contain any Clover** to avoid potential Laminitis problems in the Equine species. ALSO PLEASE NOTE: We do not include any Tetraploid Ryegrass varieties in Supreme Horse & Pony, because they inhibit the easy cutting of hay / haylage and can be detrimental to equine species digestive systems.

Weight (Kgs)	Variety	Species
1.00	BOYNE/NIFTY	(Int Dip Prg)
4.75	GENESIS/TEMPRANO	(Early Dip Prg)
4.50	KENDAL/CAVENDISH	(Late Dip Prg)
2.25	STRONG CREEPING RED FESCUE	
1.00	TIMOTHY	
13.50 Kgs / Acre Pack		

# Supreme Natural Meadow & Laminitics

A specialist high performance equine mixture **without any ryegrass** content at all. We offer this superb, (equine safe ley mix) with the option of suitable herbs being added. Produces natural diverse forage species that are both durable and highly persistent. Adding appropriate herbs to the mixture boosts the availability of vital minerals and vitamins to grazing livestock. Flexible too to make high quality hay or haylage.

Weight (Kgs)	Species
4.50	Timothy
1.50	Meadow Fescue
1.50	Smooth Stalked Meadow Grass
4.00	Strong Creeping Red Fescue
1.50	Sheeps Fescue

**13.00 Kgs Per Pack**

Option to add 0.50kgs or 1.00kgs Herbal mix when ordering.  
This contains Per. Chicory, Burnet, Ribwort Plantain, Sheeps Parsley.

## Legumes & non legumes for cover crops, fertility building and green manure

As well as Red and White Clovers we also hold significant stocks of other increasingly popular legumes. For example we can supply top quality Vetch / Persian Clover / Crimson Clover / Alsike / Sweet Yellow Blossom Clover / Sainfoin / Yellow Trefoil and Birdsfoot Trefoil to name but a few. We also have **Lucerne** and the non-leguminous green manure options of **Phacelia** and **Mustard** plus Biofumigant options in **Oil Radish** and **Mustard** (that give PCN/BCN control).

## Benefits & Features

### Ley Mixture Specifications

All mixture ingredients are fully detailed on each and every bag. If any constituents are unavailable, we reserve the right to use other suitable and equable varieties at the time of processing. Any such alterations will always be specified on all DEFRA seed labels.

### Delivery

Delivery can be implemented within 72 hours of receiving your order using our UK wide distribution networks on F.O.C. pallets or by smaller parcel carrier. Next day / 24 hour delivery can be actioned upon request, at a marginal extra cost. AM and timed deliveries are also available, please ask for details.

### Wildflowers / Meadow Mixtures / Stewardship / Pollinators

We have a very comprehensive range of wildflowers to choose from (over 80 species). They can be ordered individually, as mixtures or to compliment amenity and traditional meadow specifications. Under the various stewardship and ELM schemes, the choice is extremely wide. It gives you the opportunity to produce a wide range of colour and pollinators to suit a host of different eco systems.

### Cover Crop Seed and Game Cover

We offer an extensive range of Cover Crop/Game Seeds and Wild Bird cover, either as mixtures or as straights. We also stock a whole host of suitable seed mixtures for all stewardship and ELM schemes.

### Amenity, Lawn & Turfing Mixtures

We hold many top STRI amenity grass species. We can produce to your specifications a range of high quality amenity mixtures, for recreational, sporting or landscaping purposes (Amenity brochures available upon request).

### Technical Support

Technical support / advice on all grass, cover crop, wildflower and game cover mixtures is always to hand. We can provide excellent tips on seed bed preparation, seed rates and general husbandry for all types of seed mixtures. Don't forget, we're only a phone call away.
